

Product Highlights:

- Maximum high-speed UDMA performance and reliability
- Dramatically improves transfer speeds from card to computer*
- Includes Image Rescue™ 3 software to recover lost or deleted photo, video, and audio files**
- Limited lifetime warranty

Capacities:

2GB
4GB
8GB
16GB

Professional-Level UDMA Memory Technology

Lexar offers a comprehensive line of award-winning memory cards in various speeds, formats, and capacities, which include innovative features and valuable free software. With so many options, it's easy to find the perfect Lexar memory card to fit your workflow needs.

The Lexar Professional UDMA 300x CompactFlash® (CF) memory card provides ultimate high-speed performance and reliability for advanced photo enthusiasts and professional photographers. The card dramatically increases card-to-computer transfer rates when paired with a UDMA-enabled reader, as well as provides support for the next generation of high-resolution UDMA-enabled Digital SLR (DSLR) cameras. The Lexar Professional UDMA 300x CF card is available in 2GB, 4GB, 8GB, and 16GB capacities.

Advanced Speed and Innovation

Blazing Card-to-Computer Download Speed. The Lexar Professional UDMA CF card offers the ultimate performance available when paired with a UDMA-enabled device. The card delivers incredibly fast download speeds to satisfy the demand for faster transfer rates from card to computer, drastically reducing post-production time. Available in a range of large capacities up to 16GB, the card delivers industry-leading read/write speeds with a minimum sustained write speed capability of a blazing 300x (45MB/s) in all capacities.*

Includes Valuable Software. The Lexar Professional UDMA CF card includes Lexar Image Rescue™ 3 software, which reliably recovers most photo, video, and audio files, even if they've been erased or the card has been corrupted.** The software can also reformat the card, securely delete images, and report on the overall condition of the card, so you can ensure it's in perfect working order for your next shoot. Software is available for free download with purchase of the card.

Unmatched Performance and Reliability. The advanced technology and blazing speed of the Lexar Professional UDMA 300x CF card drastically improves download time, and also leverages the power of the next generation of UDMA-enabled DSLR cameras. The card comes with a limited lifetime warranty and a free, dedicated customer support line. With large capacities and valuable software, the Lexar Professional UDMA 300x CF card provides advanced memory card performance so you can focus on your photography.

*When used in conjunction with a UDMA-enabled reader and/or a next-generation UDMA-enabled camera.

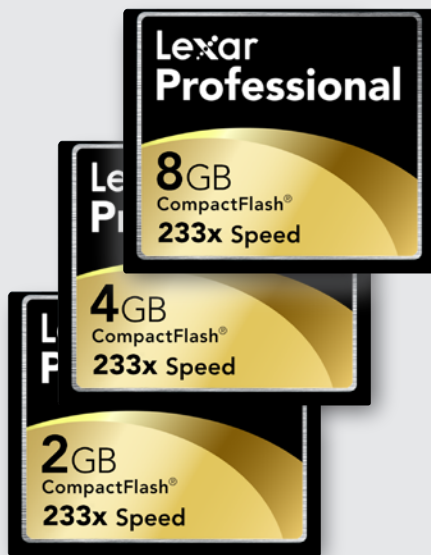

**Image or other data recovery is not 100% guaranteed.

The Lexar "x" speed rating describes minimum write speed capability where x=150KB/sec sustained write speed. Actual usable memory capacity may vary. 1MB equals 1 million bytes; 1GB equals 1 billion bytes.

8GB

Professionally Designed for High-Speed Performance

Lexar offers a comprehensive line of award-winning memory cards in various speeds, formats, and capacities, which include innovative features and valuable free software. With so many options, it's easy to find the perfect Lexar memory card to fit your workflow needs.

Trusted by professional photographers, the Lexar Professional 233x CompactFlash[®] (CF) memory card provides reliable high-speed performance so you can capture high-quality images and get the most out of your DSLR equipment. The Lexar Professional 233x CF card is available in 2GB, 4GB, and 8GB capacities.

Get the Most Out of Your Memory Card

Amazing Speed. The Lexar Professional 233x CF card is ideal for advanced photo enthusiasts and professional photographers who demand optimal performance from both the memory card and DSLR camera they use. The cards are available in a range of capacities up to 8GB, and capable of minimum sustained write speeds of 35MB per second when used with a UDMA-enabled device so you can keep shooting. The incredibly fast read/write speeds of the card fully leverage your camera's high-speed processor and accelerate image download times, making it a top choice among professional photographers.

Includes Valuable Downloadable Software. The Lexar Professional 233x CF card includes Lexar Image Rescue[™] 3 software, which recovers most photo, video, and audio files, even if they've been erased or the card has been corrupted.* The software can also reformat the card, securely delete images, and report on the overall condition of the card, so you can ensure it's in perfect working order for your next shoot. The software is available for free download with purchase of the card.

Outstanding Performance and Reliability. Capable of sustained read/write speeds of 35MB per second, the Lexar Professional 233x CF card speeds up capture times, vastly improves download time, and gives you faster recycle time to eliminate waiting between shots. Lexar Professional cards come with a limited lifetime warranty and a free, dedicated customer support line. Designed with professionals in mind, the Lexar Professional 233x CF card improves your workflow so you can focus on your photography.

*Image or other data recovery is not 100% guaranteed.

The Lexar "x" speed rating describes minimum write speed capability where x=150KB/sec sustained write speed. Actual usable memory capacity may vary. 1MB equals 1 million bytes; 1GB equals 1 billion bytes.

Product Highlights:

- FireWire 800 interface for high-speed file transfer*
- Innovative, stackable design for concurrent downloads
- Reads both UDMA CompactFlash® (CF) and standard CF cards
- Activity LED and card eject button
- Two-year limited warranty

High-Speed Reader for Professional Photographers

Lexar offers high-performance Professional UDMA readers designed to help professional photographers and advanced photo enthusiasts maximize their post-production workflow speed. Lexar Professional UDMA Readers are ideal for use with high-speed cards, and provide incredibly fast download speeds when paired with a UDMA card—so you can maximize your workflow and minimize your post-production time.

The Lexar Professional UDMA FireWire® 800 Reader is a high-performance reader with a stackable design that allows for concurrent downloads from multiple cards. Fully compatible with both UDMA CompactFlash® (UDMA CF) and standard CF memory cards, the reader provides versatility and the ability to leverage blazing-fast UDMA CF card speeds.

Save Time and Improve Workflow

High-Speed Downloads. The Lexar Professional UDMA FireWire 800 Reader supports the FireWire 800 interface with data transfer rates of up to 800Mb/sec (or 100 MB/sec)—twice as fast as traditional FireWire 400—which satisfies the demand for faster transfer rates from card to computer. When paired with a high-speed Lexar Professional UDMA card, the reader is performance optimized to deliver blazing-fast read/write speeds from the card.

Innovative, Stackable Design. Lexar Professional UDMA FireWire 800 Readers have an innovative stackable design that allows up to four readers to be daisy-chained together for concurrent downloads. This unique feature lets you configure the readers to your specific needs, and allows you to streamline your productivity and drastically accelerate your workflow capabilities. The stackable design makes it ideal for boosting productivity in a photo studio environment.

Enhance Your Business. Lexar is the brand trusted by professionals. When used in conjunction with a UDMA CF card, the reader's high-speed performance allows you to reliably improve workflow and drastically accelerate download speeds from card to computer—saving you time and money. The sleek, stackable reader comes with free, dedicated customer support and a two-year limited warranty. Designed with professional photographers in mind, the Lexar Professional UDMA FireWire 800 Reader delivers high-speed transfer rates, so you can get back to the business of photography.

*Highest transfer speeds achieved when paired with a UDMA memory card.
Actual usable memory capacity may vary. 1MB equals 1 million bytes; 1GB equals 1 billion bytes.
